p01	Personally searched for parents, using plant identifier	N/A	Water, sunlight, and name (for more research)	<input checked="" type="checkbox"/>	Went to camera first, confused about the posting page and what is fillable and what is given	Rate: 4	<input checked="" type="checkbox"/>	Camera again, went straight to post, and called it good	Rate: 3 (not much)	<input checked="" type="checkbox"/>	Checked drop-down menu, scrolled thru posts, selected	Rate: 4	<input checked="" type="checkbox"/>	Went to camera, but realized they knew plant name, so went to search	Rate: 5	Very clear, don't have to think about buttons, multiple functions for camera, thinks it'll be great for plant people	Having to use drop-down menu to see user posts, and no feedback when making a post	N/A	Both feel fine to use, there are good conventions used	N/A
p02	Not gotten much info on plants prior. Usually ask friends, read books, or youtube videos to get info on plants	Difficulty in identifying plants	How to take care of plant. "best top three things to take care of plant. Some benefits of plant"	<input checked="" type="checkbox"/>	Confused on if taking a picture accomplished task. Confused on search menu as well. Said using the camera was hard	Navigation: 4 Camera 2	<input checked="" type="checkbox"/>	Able to share plant very easily	rate:5	<input checked="" type="checkbox"/>	Goes to messages and then messages someone about plant didn't seem to have a difficult time in doing so.	Rate: 1	<input checked="" type="checkbox"/>	Was able to get info on plants fairly easily. Not too many steps	Rate:5	Likes how they can identify the plant with the camera. Likes how they can scroll through plants	Dislikes how confusing it was to operate the app and complete some tasks.	Click on plant on home page and it will display the user. Allowing them to click on the user and message them. So a message button.	Possibly no search didn't see much a reason for it	N/A
p03	Mainly used Google for their fish-tank plants about what they would require	Wants an all-in-one app, where you can search and have all the info there in one place, no clutter	Light, and how often to be watered	<input type="checkbox"/>	Went straight to search feature, and looked up the plant. Didn't fully understand task	Rate: 5	<input checked="" type="checkbox"/>	Camera, upload, post, found it quick and easy	Rate: 5	<input checked="" type="checkbox"/>	Went to messages, and found a chat with someone	Rate: 5	<input checked="" type="checkbox"/>	Used search, went to plant info, easy	Rate: 5	Easy to use, expects what you would expect from a social app	N/A	N/A	Found both of them fine, liked how search prototype had everything clickable	N/A
p04	Has a seek app that allows identify plants or he has used google	Getting a good quality photo of the plant. Also an easy to navigate menu	How to take care of a plant the first time searching for a plant. The second time learn more about the plant such as proper climate, if it's an invasive species, or know how rare a plant is.	<input checked="" type="checkbox"/>	Search button pops out at first then goes to the camera. Expected the camera to pop up in the search. Confused on how to use the camera to search and get plant info.	Camera:5 Actually getting info:2	<input checked="" type="checkbox"/>	Found it very easy to post picture of plant no real issues.	Rate:5	<input checked="" type="checkbox"/>	Clicks on the image of the plant but then went to message later. Then messaged a user	Rate:4	<input checked="" type="checkbox"/>	Goes to the search page for the plant then and finds the plant page. Also tried out the camera to help search	Rate:4	Likes the search menu and how simple it is	Disliked the camera and how confusing/hard it was to use	Map of where certain plant types are	Search feature possibly has a camera button that allows users to search with pictures/images	N/A
p05	Used Google for plant species, see what can be found, how to take care of it	Wants more user experience / personal info, thinks the information they find is super generalized	Schedule for plant, such as how much sun, water, nutrients	<input type="checkbox"/>	Went to camera first, confused about the post feature, but settled on search, not completing the task	Rate:2 because of search feature	<input checked="" type="checkbox"/>	Camera, post, found it quick and easy	Rate: 5	<input checked="" type="checkbox"/>	Used user-drop down, clicked on user, chat, and was finished	Rate: 5	<input type="checkbox"/>	Settled on search, but was confused about the prompt because they thought they didn't have any info on plant despite buying it, so they didn't complete	Rate: 1 because of search	Likes feed of people's plants and how you can reach out to them, likes the search feature if you can find it	Image search feature, our design didn't show off the image search identifier well enough	N/A	Solid to use	N/A
